

Brindha Chinnasamy

Full Stack Developer | React.js | Node.js | Python

 Tirupur, India  brindhachinasamy99@gmail.com  +91-7558125544

LinkedIn: <https://www.linkedin.com/in/brindha-chinnasamy-64b607256/> GitHub: <https://brindhac1408.github.io/brindha-portfolio/>

Tech Stack: Python | JavaScript (ES6+) | TypeScript | Node.js | React.js | REST APIs | Oracle SQL | MySQL | AWS | Docker | Kubernetes | FastAPI

EXECUTIVE SUMMARY

Full Stack Software Engineer with 4.7+ years of experience designing and delivering scalable, high-performance web applications using **React.js, Node.js, and Python (FastAPI/Django)**. Proven expertise in building robust **RESTful APIs**, developing intuitive and responsive user interfaces, and owning end-to-end product development across the **SDLC**. Strong foundation in **data structures, algorithms, and system design**, with hands-on experience in architecting low-latency, high-availability systems and optimizing database performance for large-scale applications. Skilled in modern engineering practices including microservices architecture, asynchronous programming, and cloud-native development using **AWS, Docker, and Kubernetes**. Experienced in implementing **CI/CD pipelines**, writing comprehensive unit and integration tests (**PyTest, Jest**), and enforcing secure coding and data protection standards. Demonstrated ability to lead development initiatives, mentor team members, and collaborate effectively with cross-functional stakeholders in Agile environments to deliver reliable, scalable, and production-ready solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, Java

Frontend: React.js, HTML5, CSS3, JavaScript, Context API

Backend: Node.js, FastAPI, Django, REST API Development

Databases: Oracle, MySQL, SQL Server, Redis (Exposure)

Testing: PyTest, Jest, Mocha

Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes, CI/CD Pipelines

Tools & Technologies: Git, GitHub, GitLab, VS Code, IntelliJ IDEA, PyCharm, Postman, Swagger, Linux/Unix

Concepts: Data Structures & Algorithms, OOP, Microservices Architecture, Async Programming, Distributed Systems, Secure Coding Practices

CORE COMPETENCIES

- **Django** and Django Rest Framework Development
- Scalable Backend Development using Python
- **REST API** Design and Integration
- Database Design and Optimization using **Oracle and MySQL**
- Microservices and Distributed Systems Architecture
- **CI/CD** Pipelines and **DevOps** Practices
- **Docker** and **Kubernetes** Deployment
- Secure Coding Practices and Application Security
- Unit Testing and Debugging
- Agile Development and SDLC
- Cloud Infrastructure and AWS Services
- Application Security and Access Control
- Low-latency and High-availability System Design
- Unit Testing and Integration Testing
- Secure Coding and Data Protection
- API Performance Optimization

WORK EXPERIENCE

Software Engineer Consultant

UD Trucks India Pvt. Ltd. (via TEKsystems) | Oct 2023 – Present

Bengaluru, India

- Designed and developed scalable backend services using **Python (Django, FastAPI) and Node.js**, enabling efficient handling of high-volume data processing systems.
- Built and integrated **RESTful APIs** to support real-time data flow and seamless communication between frontend and backend systems.
- Developed responsive and interactive **frontend components using React.js and JavaScript (ES6+)**, improving user experience and performance.
- Led feature-level development and collaborated with cross-functional teams, ensuring timely delivery and adherence to coding standards and best practices.

- Implemented **asynchronous programming (Promises, async/await)** to optimize API performance and handle concurrent requests efficiently.
- Designed and optimized **low-latency and high-availability systems** for performance-critical business workflows.
- Processed and transformed large datasets using efficient data handling techniques and contributed to **distributed data processing using PySpark**.
- Gained exposure to **event-driven architecture and real-time streaming using Kafka**.
- Optimized complex SQL queries, improving database performance and reducing response times significantly.
- Wrote **unit and integration test cases using PyTest and Jest**, ensuring code quality and system reliability.
- Implemented **secure coding practices and data protection mechanisms** to safeguard sensitive data.
- Deployed and managed applications using **Docker and Kubernetes on AWS**, ensuring scalability, reliability, and high availability.
- Contributed to **CI/CD pipelines** to automate testing and deployment processes.
- Worked extensively in **Linux/Unix environments** for development, debugging, and production support.

Associate Software Engineer

First Advantage Global Operating Center Pvt. Ltd. | Apr 2021 – Jul 2023

Bengaluru, India

- Developed backend applications using **Python (Django) and Java**, supporting enterprise-grade verification and risk management systems.
- Designed and implemented **RESTful APIs** for workflow automation and integration with external services.
- **Developed responsive frontend applications using React.js and JavaScript (ES6)**, enhancing usability and performance.
- Processed and analyzed large datasets to support data-driven decision-making and reporting systems.
- Optimized **SQL queries** and improved database performance for large-scale applications using **Oracle and MySQL**.
- Integrated third-party **APIs** to extend system functionality and improve automation capabilities.
- Debugged production issues and improved **system stability, reliability, and performance**.
- Ensured secure data handling and application security best practices across modules.
- Worked in an Agile development environment, contributing across development, testing, and deployment phases.

KEY PROJECTS

Vehicle Performance Analyzer

Tech Stack: Python (FastAPI, Django), Node.js, React.js, JavaScript (ES6), Oracle SQL

- Designed developed and integrated **REST APIs** using **Django Rest Framework** for real time vehicle performance calculations.
- Designed and developed scalable **RESTful APIs** using **FastAPI and Node.js**, enabling real-time vehicle performance calculations.
- Built dynamic and responsive frontend interfaces using **React.js and JavaScript**, allowing seamless user interaction and real-time data updates.
- Implemented complex mathematical models and interpolation logic for RPM, torque, and maximal mass calculations.
- Designed backend services to handle high-volume data processing and concurrent user requests efficiently.
- Optimized database queries **in Oracle SQL**, significantly improving response time and system performance.
- Ensured application reliability by writing unit test cases using **PyTest and validating API responses**.
- Applied secure coding practices and input validation to ensure data integrity and system security.
- Followed modular and reusable code practices, improving maintainability and scalability of the application.

Compliance Risk Scoring System

Tech Stack: Python (Django, Django REST Framework), Node.js, React.js, PostgreSQL/MySQL, AWS

- Developed backend services using **Django and Node.js**, enabling scalable risk scoring and data processing workflows.
- Designed and implemented **RESTful APIs** for real-time risk evaluation and decision-making systems.
- Built responsive frontend components using **React.js**, ensuring a seamless and user-friendly experience.
- Implemented rule-based and weighted scoring algorithms for accurate classification of risk levels.
- Processed and managed large datasets, ensuring high performance and scalability of the system.
- Designed efficient database schemas and optimized queries for storing risk history and audit logs.
- Deployed application components on **AWS**, ensuring secure, scalable, and reliable infrastructure.
- Wrote unit and integration test cases (**PyTest**) to ensure **API** reliability and system stability.
- Implemented secure data handling and access control mechanisms to meet compliance requirements.

EDUCATION

- **Master of Business Administration (MBA) – Information Technology & Systems Management**
NMIMS (Narsee Monjee Institute of Management Studies), Mumbai, India | CGPA: 7.8 | Graduated: 2025
- **Bachelor of Engineering (B.E.) – Electronics and Communication Engineering**
KPR Institute of Engineering and Technology, Coimbatore, India | CGPA: 8.2 | Graduated: 2021
